

SAFE® ACCESS TUBE PRESENTER

Manual Tube Presenter

It is not unknown, under the busy everyday conditions in the lab, for the wrong tube to be inadvertently removed from the tightly packed SBS / CRYO rack. D5 quickly turns into E6. Even if the error is detected during the scan, the process flow is interrupted. However, even the careful selection of the tube to be removed can become strenuous in the long run.

The LVL tube presenter is a simple tool for the processing and checking of individual samples. Simply insert the single pin into the appropriate position, place the rack on it and the protruding tube can be safely and easily removed. The column pin can be used for entire columns.

Item Number

SAFE® 96:	TP96
SAFE® 48:	TP48
SAFE® CRYO:	TP81
